

Simon Esbit, MD

Email: esbitsimon@gmail.com | Phone: +972-054-635-3288 | [Google Scholar](#)

Simon lives at the intersection of medicine and technology, bringing a physician's instinct for human connection together with a scientist's instinct for rigor. He has spent his career chasing hard problems across neuroscience, genetics, AI-assisted diagnostics, and global health - driven by a love of learning, asking questions, and finding creative solutions. Off the clock, he is running trails, exploring caves, and skiing hard, carrying that same restless curiosity into everything else he does.

Education

2021 - 2026 MD, Medical School for International Health, Ben-Gurion University of the Negev

2021 - 2026 Certificate in Global Health, Ben-Gurion University of the Negev

2017 - 2019 BS, Neuroscience and Cognitive Science - Magna Cum Laude, University of Arizona

Experience

INDEPENDENT RESEARCHER | SEPTEMBER 2021-PRESENT

Lead research projects from ideation through data analysis and publication, working closely with experts across **neuroscience, genetics, AI in healthcare, and global health**. Brings clinical and technical expertise to investigate challenging problems and turn findings into rigorous, peer-reviewed publications. Collaborate with researchers across **leading U.S., European, and Israeli institutions**. **Nine publications**.

RESEARCH ASSISTANT II | HARVARD BRAIN TISSUE RESOURCE CENTER, MCLEAN HOSPITAL | SEPTEMBER 2019-AUGUST 2021

Supported neuropathological research through postmortem brain dissection and research operations, developing **Python and VBA automations** to track productivity and generate reports, **saving ~30 minutes per person daily while reducing manual errors**. Used **SQL** to support clinical and specimen operations and fulfill tissue requests for researchers globally. Managed procurement and financial operations for a **\$12M NIH-funded initiative**. **Educated public and academic audiences** on neuroscience, mental health, and brain donation.

TEAM LEAD | SOCIAL COGNITIVE AND AFFECTIVE NEUROSCIENCE LAB, UNIVERSITY OF ARIZONA | JUNE 2017-SEPTEMBER 2019

Led operations for a **\$5M U.S. Department of Defense-funded study** investigating cognitive performance under acute stress, managing and training a **team of 10 research assistants** and overseeing complex experimental protocols. Built **REDCap databases and Python workflows** to support data collection and processing, conducted statistical analyses in R, and translated findings into reports, publications, and **15+ international conference presentations**.

RESEARCH ASSISTANT I | WIENS LAB, UNIVERSITY OF ARIZONA | SEPTEMBER 2016-JUNE 2017

Conducted **population genomic and ecological research** on *Oedipodea* grasshopper species, applying **RAD-seq** workflows from DNA extraction through library preparation and sequencing. Used **R and ArcGIS** for spatial and climatic modeling, integrating species distributions and environmental data to investigate the factors shaping divergence between closely related species.

Skills

Programming Languages: Python (Pandas, SciPy), R, VBA

Software: ArcGIS, Microsoft 365, REDCap, MySQL, Microsoft SQL Server
